

● Sales & Revenue Analysis

1. Har **City** ki total Sales calculate karo.
2. Har **Branch** ki total Gross Income calculate karo.
3. Har **Product Line** ki total Sales aur total Quantity nikalo.
4. Kaunsa Product Line sabse zyada revenue generate karta hai?
5. Kaunsa Product Line sabse kam revenue generate karta hai?
6. Har Branch ka **average Unit Price** calculate karo.
7. Har City ka **average Sales per transaction** calculate karo.
8. Har Product Line ka **average Rating** nikalo.
9. Top 10 highest-value transactions identify karo based on Sales.
10. Sales ko **Low / Medium / High** categories mein divide karo using IF.

● Customer Analysis

11. Har City mein **Member vs Normal customers** ki count nikalo.
12. Member customers ki total Sales aur Normal customers ki total Sales compare karo.
13. Female aur Male customers ki total Sales compare karo.
14. Har Product Line mein Female aur Male customers ki Sales calculate karo.
15. Kis Customer Type ka **average Rating** highest hai?
16. Har City mein Member customers ka percentage calculate karo.
17. Har Branch mein Female customers ki percentage calculate karo.
18. Identify karo ki kis Product Line mein **Member customers sabse zyada** hain.
19. Customer Type aur Gender ke combination se total Sales nikalo.
20. Aise transactions count karo jahan **Quantity > 5** aur Customer Type = Member ho.

● Product Analysis

21. Har Product Line ki **average Quantity per transaction** calculate karo.
22. Kaunsa Product Line sabse zyada average Quantity sell karta hai?
23. Har Product Line ka minimum aur maximum Unit Price nikalo.
24. Aise products/transactions identify karo jahan Unit Price **50 se zyada** hai.
25. Aise transactions count karo jahan Quantity **10** hai.

26. Har Product Line ka total COGS calculate karo.
27. Har Product Line ka total Gross Income calculate karo.
28. Gross Income ke basis par Product Lines ko rank karo.
29. Top 3 Product Lines identify karo based on Gross Income.
30. Aise Product Lines identify karo jinka average Rating **8 se zyada** hai.

● **Date & Time Analysis**

31. Date column se **Month** extract karo.
32. Har month ki total Sales calculate karo.
33. Har month ki total Gross Income calculate karo.
34. Kaunsa month highest Sales generate karta hai?
35. Kaunsa month lowest Sales generate karta hai?
36. Date se **Day Name (Monday, Tuesday...)** extract karo.
37. Har weekday ki total Sales calculate karo.
38. Kaunsa weekday highest average Sales generate karta hai?
39. Time column se **Hour** extract karo.
40. Morning, Afternoon aur Evening ke according transactions categorize karo.

● **Advanced Mid-Level Challenges**

41. **City + Product Line** ke basis par total Sales nikalo using SUMIFS.
42. **Branch + Customer Type + Gender** ke basis par transaction count nikalo using COUNTIFS.
43. Har City ka **Top Product Line** identify karo based on Sales.
44. Har Branch ke andar highest Gross Income wala transaction identify karo.
45. Sales ke basis par **Rank** column create karo aur har transaction ko rank do.
46. Har transaction ke Sales ko uske **City ke average Sales** se compare karo aur "Above Average" / "Below Average" label lagao.
47. Aise transactions identify karo jahan **Sales > City Average Sales AND Rating > 8**.
48. Har Product Line ka **Gross Income % of Total Gross Income** calculate karo.
49. Ek Pivot Table banao jisme:

- Rows = City
- Columns = Product Line
- Values = Total Sales
aur identify karo har City ka highest-selling Product Line.

50. **Final Challenge:** Ek complete Sales Dashboard banao jisme **Total Sales, Total Gross Income, Total Quantity, Average Rating, Top Product Line, Top City, Monthly Sales Trend, City-wise Sales aur Product Line-wise Gross Income** show ho.
